PROFESSIONAL SUMMARY

Technical Manager and product-minded engineering leader with 10+ years of experience building software in early-stage and growth-stage startups. Experience spanning frontend and full-stack engineering, hybrid mobile applications, product development, technical architecture, and engineering team leadership. Currently focused on AI-native software engineering, agentic SDLC automation, scalable engineering practices, and connecting product priorities with technical execution.

CORE COMPETENCIES

Engineering Leadership | Technical Strategy | Product Engineering | Software Architecture | Frontend Engineering | Technical Product Development | Cross-functional Collaboration | AI-native SDLC | Agentic AI Exploration | Proofs of Concept | Full-stack Development | JavaScript | AngularJS | Ionic | Cordova

PROFESSIONAL EXPERIENCE

Technical Manager | zenda

Jan 2026 – Present

- Lead work on AI-native software engineering practices, exploring agentic AI approaches to automate and improve the software development lifecycle.
- Focus on sustainable engineering processes, scalable systems, and engineering team effectiveness.
- Connect product priorities, architectural considerations, and technical delivery decisions.

Technical Lead (Product Management) | zenda

Nov 2022 – Dec 2025

- Led the frontend engineering practice, supporting team development, sustainable processes, and engineering culture.
- Collaborated with product leadership to validate new product verticals and improve existing product capabilities.
- Directed technical research, proofs of concept, and implementation of new product modules.

Co-Founder and Chief Technology Officer | Zporty

Jul 2020 – Nov 2022

- Co-founded a sports technology venture focused on connecting sports enthusiasts and addressing operational needs of amateur sports organisations.
- Owned technology and product development across the startup lifecycle.
- Assessed product-market fit; the venture was ultimately shelved after it did not achieve sufficient traction.

Full Stack Developer | nexquare

May 2019 – Jul 2020

- Worked directly with the Head of Product on core product features, technical research, and scaling challenges.
- Helped build Nexopay, a new product vertical that later became zenda.

Front End Consultant | ConceptOwl

Aug 2018 – May 2019

- Mentored junior frontend teammates and supported continuity of frontend delivery in a consulting capacity.

Front End Developer | ConceptOwl
Apr 2016 – Jul 2018

- Built web and hybrid mobile applications using AngularJS and Ionic as part of an early-stage education technology team.
- Contributed to product development and the startup's digital presence.

Junior Front End Developer | NewAge SMB
Aug 2015 – Mar 2016

- Developed web and Cordova-based mobile applications for US small-business clients using AngularJS and Ionic.

Web Development, Student Startup | IEDC MBITS
May 2014 – Aug 2015

- Built websites and supported organic search and social-media presence for local businesses while in college.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering
Mahatma Gandhi University | 2011 – 2015

CAREER FOCUS

Technical strategy and software architecture; product-led engineering leadership; sustainable engineering organisations; AI-native delivery and responsible adoption of agentic engineering workflows.
